

LESCO®

LESCO-Sol

Spray Tank Cleaner

- 1/2 Pound Treats 50 Gallons
- Neutralizes Organic Acids
- Effective on Hard to Remove Chemicals

Keep Out of Reach of Children
CAUTION
 Read All Directions Before Using

PRECAUTIONARY STATEMENTS
 May cause skin or eye irritation. In case of accidental eye contact, flush eyes with water. If irritation persists, obtain medical attention. Wash exposed skin areas with soap and water.

Net Contents: 32oz. #023232

LESCO, Inc. • 15885 Sprague Road • Strongsville, OH 44136-1799

DIRECTIONS

100 GALLON (OR LARGER) TANKS: Dissolve 1 pound (16 oz.) in 100 gallons water. Close boom valves. Agitate vigorously. Open bypass valve and circulate solution with pump for 15 minutes. Use hose or hand boom to thoroughly wash all internal parts of tank and cover. Open boom valve allowing solution to flow through boom and nozzles. Refill tank with 50 gallons water. Circulate for ten minutes emptying tank by spraying through boom and nozzles. If changing chemicals, a second rinse with 25 gallons of water is recommended. Do not rinse when storing rig at end of season - leave protective coating.

1 to 100 GALLONS TANKS: Fill tank half full of water. Add 1 oz. of TANK CLEANER for every six gallons of tank volume. Example: for a 50 gallon tank, use 1/2 lb (8 oz.).

RINSATE TESTING

Certain pesticides, including but not limited to 2,4-Ds and Sulfonylurea, are difficult to remove from the tank. Pesticides are extremely active at very low rates and must be completely removed from the tank to prevent crop damage. Do not apply TANK CLEANER or rinsate

directly to plants. Rinsate levels may be tested by several different methods; two are suggested here:

Method One: Retain a sample of the rinsate solution. Apply sample to sensitive plants such as an ornamental flower, tomato, or cotton. Observe treated plant for 48 hours or longer, and do not use tank during the test period. If plant damage occurs, reclean the tank until the rinsate is pesticide free.

Method Two: Retain a sample of rinsate solution and submit to a qualified testing laboratory for analysis. Operators of multiple chemical use equipment and growers of high value or sensitive crops may wish to use all available testing methods to prevent accidental contamination and plant damage.

WARRANTY: LESCO warrants that this product, when used in accordance with label directions under normal conditions, is reasonably fit for its intended purposes. Since timing, method of application, weather, plant and soil conditions, mixture with other chemicals, and other factors affecting the use of this product are beyond our control, no warranty is given concerning the use of this product contrary to label directions or under conditions which are abnormal or not reasonably foreseeable. The user assumes all risks of any such use.
